Beautiful. Sustainable. Weatherproof.

MYDECK Premium WPC boards have been leading the way in quality and design for 20 years. The design boards are characterized by their incomparable feel, beautiful surface design and attention to detail.

Wood from sustainably managed German and French forests is used for our boards. The renewable raw material is combined with recyclable polyethylene in a patented process. The combination of the two materials gives the boards their weatherproof and easy-care properties.

The wood used [mainly spruce and Douglas fir] is a by-product of timber companies and joineries. The use of the wood chips and upcycling them into durable floorboards helps to use wood as a resource sustainably.

MYDECK boards are free of tropical wood and therefore contribute to the protection of the rainforests.

MADE IN GERMANY

one

## Easy care

— no more sanding and impregnation required

Weatherproof and colourfast.

two

## Non-slip + suitable for bare feet

Top grade C for slip resistance in wet barefoot areas and in pedestrian areas R12 according to EN 16165:2021 for the COLOURS one collection. All test results summarized in the document 'Technical Information' at [MYDECK.de/download](https://mydeck.de/download).

three

## Resistant to salt water and chlorinated water

Ideal for terrace, deck and pool.

four

## Solid WPC full profile

— ideal dimensional stability

No warping and twisting as with conventional wooden floorboards.

five

## Sustainable forestry

No tropical wood.

six

## No pollutants

Without heavy metals, CFCs, PCBs, impregnating agents or wood preservatives.

seven

## Long-term builder's warranty

25-year guarantee against splintering and structural damage caused by fungal or other infestation by termites or wood-eating insects when our designer decking is used in private homes [10-year guarantee when used in public spaces]. Details on our guarantee card.
